PROFESSIONAL SUMMARY

Electrical and Electronics Engineering student at the University of Khartoum with strong experience in frontend web development, AI-integrated applications, and software engineering. Experienced in building scalable React and Next.js applications, Android apps using Jetpack Compose, and interactive engineering tools. Passionate about open-source technologies, Linux environments, and creating user-focused software solutions. Proven ability to learn quickly and deliver impactful projects, including a 2nd place achievement in the Code-for-Sudan Hackathon.

EDUCATION

University of Khartoum <i>Bachelor of Electrical and Electronics Engineering (EEE)</i>	Khartoum, Sudan Aug. 2022 – Expected Nov. 2028
- Third-year engineering student with focus on software engineering, digital systems, and problem solving - Combining Electrical Engineering fundamentals with modern frontend and AI technologies	
Dr. Abdallah Karm eldeen Secondary School <i>First Class Honors – Final Grade: 97.3%</i>	Sudan Feb. 2019 – Jun. 2022

EXPERIENCE

Engineering Association – University of Khartoum <i>Technical Office Member (Part-Time)</i>	Feb. 2026 – Present Khartoum, Sudan
- Contributed to technical operations and frontend development initiatives for organizational platforms - Collaborated with teams on technical projects, and web-related tasks	
IC LAB <i>Frontend Web Developer</i>	Jan. 2026 – Mar. 2026 Remote
- Developed interactive digital circuit simulation interfaces using React.js, TypeScript, and modern frontend technologies - Built responsive and user-friendly educational tools for simulating logic circuits and breadboard systems - Deployed and managed frontend applications using Vercel	
White-hands School <i>STEM Educator (Part-Time)</i>	Apr. 2024 – Jul. 2024 Sudan
- Mentored students in STEM and engineering-related subjects through interactive educational sessions - Designed simplified explanations and practical activities to improve student engagement	

PROJECTS

IC LAB – Digital Logic Circuit Simulator <i>React.js, TypeScript, Canvas API</i>	2025
- Engineered an interactive browser-based digital circuit simulator for 7400-series ICs and breadboard systems - Implemented real-time logic propagation and circuit interaction using custom frontend rendering techniques - Designed responsive educational interfaces optimized for desktop and web-based engineering learning - Built and deployed scalable frontend architecture using React.js and TypeScript	
Lazy Todos – AI Task Manager <i>Kotlin, Jetpack Compose, Firebase, Gemini API</i>	2025
- Developed an AI-powered Android productivity application using Jetpack Compose and MVVM architecture - Integrated Google Gemini API to convert natural language input into structured tasks and reminders - Implemented offline-first synchronization and scalable state management using Firebase Firestore and StateFlow - Added features including voice input, subtasks, reminders, and responsive UI workflows	
shifaaS – Code-for-Sudan Hackathon Project <i>Web Technologies, HTML, CSS, JS Rest API</i>	2025
- Secured 2nd place in the Code-for-Sudan Hackathon by contributing to a high-impact web platform - Collaborated within a fast-paced development environment to design and implement frontend functionality - Focused on usability, responsiveness, and scalable web architecture under competitive deadlines	
Prompt-Manager <i>C++, CLI Development</i>	2025
- Built a lightweight terminal-based toolkit for organizing and retrieving AI prompts efficiently - Designed command-line workflows and file management utilities using modern C++	

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Kotlin, C++, Java, Python, HTML/CSS

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap, Responsive Design, PWAs

Mobile Development: Android Development, Jetpack Compose, Flutter, MVVM Architecture

Tools & Platforms: Git, GitHub, Linux, Ubuntu, Firebase, Vercel, VS Code

Concepts: REST APIs, State Management, OOP, Frontend Architecture, Problem Solving

Engineering: Digital Logic Simulation, Circuit Design Fundamentals, Electrical Engineering Concepts

LEADERSHIP & COMMUNITY

GDG on Campus – University of Khartoum

Technical Team Member

Opportunities Group SD

Opportunities Hunter

Student Organization

Content Writer – Central Student Secretariat

Feb. 2026 – Present

Khartoum, Sudan

Jan. 2026 – Present

Remote

Jan. 2026 – Present

Sudan

CERTIFICATIONS

- Google – Introduction to Git and GitHub
- AWS – Introduction to Software Development
- Google DSC UofK – Android Development
- Sololearn – JavaScript, HTML, CSS, Python, C++, jQuery
- Coursera – Time Management

OTHER CERTIFICATIONS

- GDG UofK – Member of the Month
